

## Snow Homework

Enjoy your snow day! Keep busy by having a go at some of the tasks below.

Skill	Task Option 1	Task Option 2
Talk	Have you ever seen snow before? What memories do you have of snow?	Which animals or people live in snowy places? How do they survive?
Research	What is the weather going to be like over the next few days? Can you present this, perhaps using symbols to help? Maybe you could practice being a weather reporter and film the weather forecast!	What different kinds of sports do people play or do in the snow?
Create	Can you make a piece of art inspired by the snow?	Can you design an outfit that would keep you warm, dry and safe in the snow?
Understand	Which countries in the world often experience snow? Which of these countries would you like to visit and why?	What risks are there when it snows?
Experiment	How much does a snowball weigh? Now, allow your snowball to melt. Does the weight change?	How far can you throw a snowball? How could you measure the distance?
Reflect	Would you like it to be snowy all the time?	What changes would need to be made to our school to keep it open on very snowy days?
